

Respecting the environment.

The use of environmentally-friendly aerosol and non-aerosol sprays is of central importance to us. In fact, it is in the interest of us all. Hence our focus on intelligent solutions when it comes to packaging your products. Our aerosol cans and packaging materials represent the state-of-the-art in environmentally-friendly technology.

Benefit from our experience as a specialist in product development, manufacturing and packaging, with products that are delivered to your deadlines and meet the most exacting quality standards.

Completely in the service of your product.

AEROSAN AG

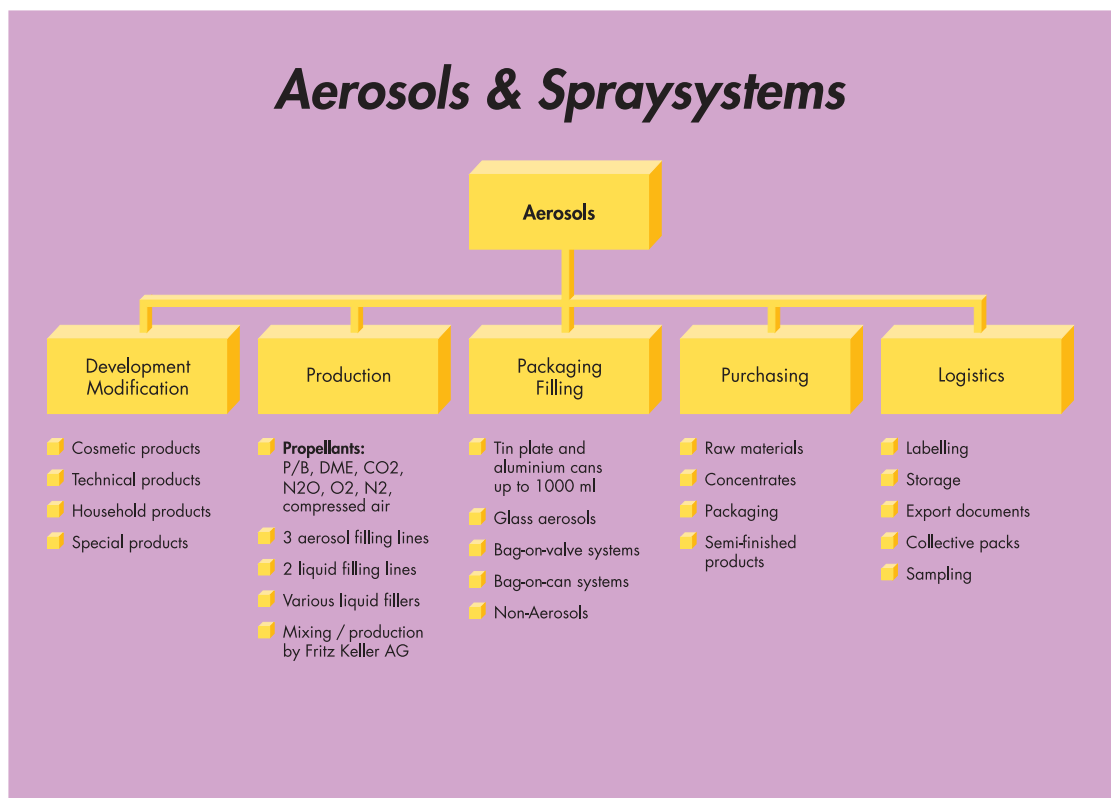

Business unit: Aerosols & Spraying Systems
www.aerosan.ch

Outsourcing: Aerosols.

When it comes to manufacturing aerosol and non-aerosol sprays, having the right technical facilities is one thing but dependability is equally important. You need a partner you can trust to offer a combination of sound knowledge, rigorous process management and strict quality control.

We have a tradition dating back over 50 years of working with aerosol and non-aerosol sprays and of applying environmentally-friendly solutions to the development, manufacturing, bottling and packaging of products.

We consistently work to **ISO 9001** standards and deliver market-ready products to your deadlines.

Experience with us what experience can do.
